

Movements that Change the World

This three day course presented by Steve Addison will examine a missionary movement founded by Jesus to continue his ministry in the power of the Holy Spirit. He calls us to participate in a movement that proclaims the gospel, makes disciples and multiplies communities of faith throughout the world. In this course students will discover that these dynamic movements display five recurring characteristics and participants will identify these characteristics from biblical, historical, and contemporary case studies and apply them to their contexts.

Presented by Steve Addison
